

ATUL YADAV

Principal Full-Stack Software Engineer | .NET / C# | React | Azure Cloud & DevOps

Noida Ext., India 201009 | atulyadav012@gmail.com | +91-8744972294 | Open to Remote (US Client Hours)

PROFESSIONAL SUMMARY

Full-stack software engineer with 11+ years designing and leading delivery of enterprise-scale applications across .NET/C#, React, Angular, and Azure. Proven track record architecting cloud-native solutions and owning the full SDLC from design through CI/CD deployment. Hands-on technical leader who mentors engineers, drives architecture decisions across multi-team programs, and delivers for government and Fortune 500 clients where reliability, security, and compliance are non-negotiable. Thrives operating independently in ambiguous environments and taking end-to-end ownership of critical initiatives — from Kafka-based data platforms to Azure DevOps CI/CD pipelines built on Infrastructure as Code.

CORE TECHNICAL SKILLS

Languages & Frameworks: C#, .NET Core, ASP.NET MVC / Web API, Entity Framework, LINQ, TypeScript, JavaScript

Frontend: React.js, Angular, Redux/Context, Bootstrap, HTML5, CSS3

Cloud (Azure): App Services, Azure Functions, Logic Apps, Storage, Azure AD, API Management

DevOps & IaC: Azure DevOps, CI/CD Pipelines, Terraform, Docker, Kubernetes (AKS), YAML, PowerShell, Git, Bitbucket, GitHub

Quality & Observability: Test Automation & Unit Testing (xUnit/NUnit), Code Quality/SDLC Best Practices, Azure Monitor & Application Insights, Log Analytics, Alerting & Production Support

Data: SQL Server, MongoDB, PostgreSQL, Kafka (pub-sub architecture)

Other: TFS, Power BI, Technical Leadership & Mentoring, Regulated/Government Systems

PROFESSIONAL EXPERIENCE

Senior Tech Specialist (.NET & React) — Technical Lead | Coforge Ltd.

Dec 2024 – Present

- Lead the Syncflow team (1 of 10 scrum teams) building an enterprise data-synchronization platform on a Kafka-based pub-sub architecture, owning architecture decisions and technical direction.
- Provide hands-on mentorship to engineers and drive full-stack delivery across .NET Core, React, and Azure to ensure seamless integration across multiple enterprise applications.
- Partner with cross-functional stakeholders to translate business requirements into scalable, production-ready technical solutions.

Sr. Full Stack Developer | App Inventiv

Nov 2023 – Nov 2024

- Maintained and extended scalable modules within a 30+ member Agile engineering organization.
- Delivered ECM Direct for Emaar (Dubai) using .NET Core API, React, Angular, and SQL Server, supporting a large enterprise client with high-availability requirements.

Sr. Application Developer | Derrick Corporation

Jun 2020 – Oct 2023

- Led end-to-end development of Velocity, a custom MRP system, and Prodigy, a product-efficiency comparison application, using React, Angular, .NET Core, and Azure DevOps.
- Owned CI/CD pipeline design in Azure DevOps to standardize build and release processes across both platforms.

Software Engineer | Rose IT Solutions Pvt. Ltd.

Jul 2018 – Jun 2020

- Built full-stack features for an internal CRM (QPro) and UWP-based desktop tools using ASP.NET, VB.NET, SQL Server, and Azure AD.

Sr. Software Engineer | Intellisoft Technologies

Jul 2017 – Jul 2018

- Delivered web and Windows applications for US-based clients, including the Irvine LIMS Dashboard and a Printing App, using ASP.NET MVC, Kendo UI, and WinForms.

Software Engineer | SEWA ONLINE

Jun 2014 – Jun 2017

- Built government (regulated-sector) web applications using ASP.NET and MySQL/SQL Server, including grievance-management systems and document-automation tools requiring strict data integrity and audit compliance.

EDUCATION

- MCA — IGNOU (Distance) — 65%
- B.Sc. Computer Science — Delhi University (Regular) — 75%
